Yes – thanks all!

We're in good shape on the schedule, no delays or anything of that nature.

Hi Christy;

No worries at all. I don't perceive that there was a delay of any kind.

Thank you!

Hi Christy;

Great to see you again today! Below is the email exchange that we discussed on the team call.

TB sent to Mayor Weeks on July 20, 2020

Hi Mayor;

Hope this note finds you well. Glad to see the rain this morning. Hopefully, the Holden area received some.

Thank you for circling me into this conversation. I appreciate it and am looking forward to the video conference next week.

As I read through the document, it looks like EPA is asking for the standard access to land owned and overseen by the City of Holden for air intrusion testing.

If you wish to discuss further, I'm happy to help in any way.

Thank you for all you do!

Mr. Weeks–

We spoke a while back about the access form we normally use for sampling activities on site, I think you mentioned JCEDC may need to sign-off as well for any activities at the old site property? I've copied Ms. Brantner as well on this as a follow up.

The form attached addresses some additional areas we would like to sample. I've included areas near the office at the City road maintenance property and some areas along the access road to the water treatment plant (West side of the site). Additional sampling locations will be along the roadways and right-of-ways near the site. Depending on the construction schedule on W. 2nd St., we should be able to fit in some sampling around the work they are currently doing. The sample at the Road Maintenance office would be an indoor-air and sub-slab sample, the indoor air sample is described in the document under "Scope of Access" section.

If you would provide the appropriate signatures on the document and return to my attention, either scanning it back to me or sending via mail is fine.

Thanks again for you coordination and assistance on this – MS
